

Humana

Value-Based Care Agreement — Medicare Advantage Stars Quality Program

1. Contract Overview

This agreement is entered into between **Humana** (hereinafter 'Payer') and the participating health system (hereinafter 'Provider') for the contract period **January 1, 2025 — December 31, 2025**. This contract covers an attributed patient population of approximately **5,200** members. The agreement operates under a **Upside-Only** risk arrangement. The total shared savings opportunity is estimated at **\$1,800,000** annually.

2. Risk Arrangement

Under this Upside-Only arrangement: If Provider meets or exceeds the aggregate quality benchmark, Provider shall receive **50%** of realized shared savings. This contract does not include downside risk sharing.

3. Quality Performance Metrics

Provider performance shall be evaluated based on the following quality metrics. Each metric contributes to the overall Star Rating calculation as specified by the assigned weight. The target overall Star Rating for this contract is **4.5 Stars**.

Metric ID	Metric Name	Description	Target	Weight
HQ-01	Diabetes: A1C Poor Control	Percentage of patients with diabetes whose A1C is $\geq 9.0\%$ (lower is better)	$\leq 14\%$	3x
HQ-02	Controlling Blood Pressure	Percentage of patients with hypertension whose BP is adequately controlled ($< 140/90$)	$\geq 75\%$	3x
HQ-03	Colorectal Cancer Screening	Percentage of eligible adults with up-to-date colorectal cancer screening	$\geq 70\%$	2x
HQ-04	Breast Cancer Screening	Percentage of eligible women with mammogram in past 27 months	$\geq 72\%$	2x
HQ-05	Medication Adherence: RAS Antagonists	Percentage of patients on RAS antagonists with PDC $\geq 80\%$	$\geq 80\%$	3x
HQ-06	Medication Adherence: Statins	Percentage of patients on statin therapy with PDC $\geq 80\%$	$\geq 80\%$	3x
HQ-07	Osteoporosis Management (Post-Fracture)	Percentage of women 67-85 with fracture who received osteoporosis treatment	$\geq 15\%$	1x
HQ-08	Fall Risk Screening	Percentage of patients 65+ screened for fall risk	$\geq 60\%$	1x
HQ-09	Annual Wellness Visit Completion	Percentage of attributed patients who completed an Annual Wellness Visit	$\geq 68\%$	2x

4. Star Rating Calculation Methodology

The overall quality score is calculated as the weighted sum of individual metric scores, normalized to a 5-point scale. Metrics designated with higher weights (2x or 3x) reflect priority areas identified by the Payer for this contract period. A minimum Star Rating of **4.0 Stars** is required to qualify for shared savings distribution. Ratings below **3.5 Stars** will trigger the downside risk provisions outlined in Section 2.

5. Payment Terms

Quality performance shall be evaluated on a semi-annual basis. Shared savings distributions shall be made within 90 days of the end of each evaluation period. Provider shall submit quality metric data through the designated reporting portal no later than the 15th of each month following the reporting period.

6. Metric Definitions and Inclusion Criteria

HQ-01 — Diabetes: A1C Poor Control

Denominator: Patients aged 18-75 with diabetes (Type 1 or Type 2) and at least one encounter. Numerator: Patients with most recent A1C $\geq 9.0\%$. Inverse metric. Exclusions: Gestational diabetes, hospice.

HQ-02 — Controlling Blood Pressure

Denominator: Patients aged 18-85 with hypertension and at least one encounter. Numerator: Most recent BP $< 140/90$ mmHg. Exclusions: ESRD, hospice, pregnancy.

HQ-03 — Colorectal Cancer Screening

Denominator: Patients aged 45-75. Numerator: Appropriate screening completed per USPSTF guidelines. Exclusions: Prior colorectal cancer, total colectomy.

HQ-04 — Breast Cancer Screening

Denominator: Female patients aged 50-74. Numerator: Mammogram within 27 months. Exclusions: Bilateral mastectomy, hospice.

HQ-05 — Medication Adherence: RAS Antagonists

Denominator: Patients with at least two fills of an ACE inhibitor or ARB. Numerator: PDC $\geq 80\%$. Exclusions: Less than two fills in measurement period.

HQ-06 — Medication Adherence: Statins

Denominator: Patients with at least two fills of a statin medication. Numerator: PDC $\geq 80\%$. Exclusions: Less than two fills.

HQ-07 — Osteoporosis Management (Post-Fracture)

Denominator: Female patients aged 67-85 with a fracture. Numerator: Received bone mineral density test or osteoporosis medication within 6 months. Exclusions: Active osteoporosis treatment prior to fracture.

HQ-08 — Fall Risk Screening

Denominator: Patients aged 65 and older with at least one encounter. Numerator: Documented fall risk screening using standardized tool. Exclusions: None.

HQ-09 — Annual Wellness Visit Completion

Denominator: All attributed Medicare Advantage members. Numerator: Patients who completed an Annual Wellness Visit (AWV) or Initial Preventive Physical Examination (IPPE) during the measurement year. Exclusions: None.

CONFIDENTIAL — For authorized use only.
