

Aetna

Value-Based Care Agreement — Commercial Value-Based Quality Incentive Agreement

1. Contract Overview

This agreement is entered into between **Aetna** (hereinafter 'Payer') and the participating health system (hereinafter 'Provider') for the contract period **July 1, 2025 — June 30, 2026**. This contract covers an attributed patient population of approximately **12,000** members. The agreement operates under a **Two-Sided Risk** risk arrangement. The total shared savings opportunity is estimated at **\$4,500,000** annually.

2. Risk Arrangement

Under this Two-Sided Risk arrangement: If Provider meets or exceeds the aggregate quality benchmark, Provider shall receive **55%** of realized shared savings. If Provider fails to meet the minimum quality threshold, Provider shall be responsible for **30%** of excess costs, capped at **\$600,000**.

3. Quality Performance Metrics

Provider performance shall be evaluated based on the following quality metrics. Each metric contributes to the overall Star Rating calculation as specified by the assigned weight. The target overall Star Rating for this contract is **4.0 Stars**.

Metric ID	Metric Name	Description	Target	Weight
AQ-01	Diabetes: Hemoglobin A1C Testing	Percentage of diabetic patients with at least one A1C test in measurement year	>=88%	2x
AQ-02	Diabetes: A1C Control (< 8.0%)	Percentage of diabetic patients with most recent A1C < 8.0%	>=55%	3x
AQ-03	Hypertension: BP Control	Percentage of patients with hypertension whose BP < 140/90	>=70%	3x
AQ-04	Preventive: Cervical Cancer Screening	Percentage of women 21-64 with appropriate cervical cancer screening	>=72%	1x
AQ-05	Preventive: Adult BMI Screening & Follow-Up	Percentage of patients 18+ with BMI documented and follow-up plan if abnormal	>=60%	1x
AQ-06	Behavioral Health: Depression Screening	Percentage of patients 12+ screened for depression using PHQ-2/PHQ-9	>=50%	1x
AQ-07	Asthma: Medication Ratio	Percentage of patients with persistent asthma and medication ratio >= 0.50	>=68%	2x
AQ-08	Emergency Department Utilization	ED visits per 1,000 member months (lower is better)	<=45	2x

Metric ID	Metric Name	Description	Target	Weight
AQ-09	Hospital Readmission Rate (30-day)	30-day all-cause readmission rate (lower is better)	<=12%	3x
AQ-10	Care Coordination: Transitions of Care	Percentage of patients with follow-up visit within 14 days of hospital discharge	>=58%	2x

4. Star Rating Calculation Methodology

The overall quality score is calculated as the weighted sum of individual metric scores, normalized to a 5-point scale. Metrics designated with higher weights (2x or 3x) reflect priority areas identified by the Payer for this contract period. A minimum Star Rating of **3.5 Stars** is required to qualify for shared savings distribution. Ratings below **3.0 Stars** will trigger the downside risk provisions outlined in Section 2.

5. Payment Terms

Quality performance shall be evaluated on a quarterly basis. Shared savings distributions shall be made within 90 days of the end of each evaluation period. Provider shall submit quality metric data through the designated reporting portal no later than the 15th of each month following the reporting period.

6. Metric Definitions and Inclusion Criteria

AQ-01 — Diabetes: Hemoglobin A1C Testing

Denominator: Patients aged 18-75 with diabetes. Numerator: At least one A1C lab test performed. Exclusions: Gestational diabetes.

AQ-02 — Diabetes: A1C Control (< 8.0%)

Denominator: Patients aged 18-75 with diabetes and at least one encounter. Numerator: Most recent A1C < 8.0%. Exclusions: Gestational diabetes, hospice.

AQ-03 — Hypertension: BP Control

Denominator: Patients aged 18-85 with hypertension. Numerator: Most recent BP < 140/90 mmHg. Exclusions: ESRD, pregnancy, hospice.

AQ-04 — Preventive: Cervical Cancer Screening

Denominator: Women aged 21-64. Numerator: Pap test within 3 years (age 21-64) or HPV test within 5 years (age 30-64). Exclusions: Hysterectomy with no residual cervix.

AQ-05 — Preventive: Adult BMI Screening & Follow-Up

Denominator: Patients aged 18 and older with at least one encounter. Numerator: BMI documented during the measurement year with a follow-up plan if BMI is outside 18.5-25.0. Exclusions: Pregnant patients.

AQ-06 — Behavioral Health: Depression Screening

Denominator: Patients aged 12 and older. Numerator: Screened using PHQ-2 or PHQ-9 with documented follow-up if positive. Exclusions: Active depression or bipolar diagnosis.

AQ-07 — Asthma: Medication Ratio

Denominator: Patients aged 5-64 with persistent asthma and at least one asthma controller or reliever medication. Numerator: Patients with a ratio of controller medications to total asthma medications ≥ 0.50 . Exclusions: COPD, emphysema, cystic fibrosis.

AQ-08 — Emergency Department Utilization

Numerator: Total ED visits by attributed members. Denominator: Total member months. Rate expressed per 1,000 member months. This is an inverse metric — lower utilization indicates better ambulatory care management. Exclusions: Trauma-related visits.

AQ-09 — Hospital Readmission Rate (30-day)

Denominator: All acute inpatient discharges for attributed members. Numerator: Unplanned readmissions within 30 days of discharge. Inverse metric. Exclusions: Planned readmissions, transfers, patients who died during index stay.

AQ-10 — Care Coordination: Transitions of Care

Denominator: Patients discharged from an acute inpatient stay. Numerator: Patients with a documented outpatient follow-up visit within 14 days of discharge. Exclusions: Patients transferred to another acute facility, patients who died.

CONFIDENTIAL — For authorized use only.

Document generated for demonstration purposes. Contract ID: AET-COMM-2025-FL-5510
